HAN_UNIVERSITY OF APPLIED SCIENCES

What are characteristics you know about Bayesian statistics so far?

HAN_UNIVERSITY OF APPLIED SCIENCES

Which of these jobs do you believe is more probable for Kylie?

0	0
She's a nurse	She's in the army

What percentage do you think fits Kylie's description?

What percentage of female nurses do you think fit Kylie's description?

What percentage of female military personnel do you think fit Kylie's description?

0%

100%

Number of female nurses and female military personnel:

5.723 in the Army in the Netherlands (+-2%)

211.017 Nurses in the Netherlands (+-98%)

HAN_UNIVERSITY OF APPLIED SCIENCES

Which of these jobs is more likely for Kylie?

0	0
She's a nurse	She's in the army

What is the probability of the patient having the disease?

HAN_UNIVERSITY OF APPLIED SCIENCES

What is the posterior probability of the patient having the disease?

HAN_UNIVERSITY OF APPLIED SCIENCES

What do you think the effect of the chosen prior is?

How would you choose a prior?

Which one relates to Bayesian inference?

0	0
Long-run frequencies	Degree of believes

Which one relates to Bayesian inference?

0	0
Credibility intervals	Confidence intervals

Which one relates to Bayesian inference?

0	0
Hypothesis testing	Updating priors

If I have an uninformative prior:

0	0
Posterior will skew towards the data	Posterior will skew towards the prior

If I have a very strong prior:

0	0
Posterior will skew towards the data	Posterior will skew towards the prior

HAN_UNIVERSITY OF APPLIED SCIENCES

What is the assumption of independence the naive bayes classifier makes?

0	0	0
Features are independent	Features are independent given the target class	The target classes are independent
